

# Spring Paint Kit - Watering Can Tulips

1. Paint all pieces and allow them to dry. Thin coats of paint will dry quickly & multiple thin coats will help avoid streaks.

Hi

Kit includes 6 pieces

2. First, glue the bottom layer of watering can to the background piece, the piece without the polka dots.

3. Then glue the top layer of the watering can over the bottom layer and glue on the two additional tulip pieces.

4. In the center of the circle on the watering can, glue the word Hi.

6. Glue twine on the back of the sign for hanging in either of the styles shown in the example. Hot glue works quickest, but tacky glue also works!
