

Fall Paint Kit - Hello Fall Pumpkin

1. Paint all pieces and allow them to dry. Thin coats of paint will dry quickly & multiple thin coats will help avoid streaks.

Kit includes 12 pieces

2. First glue the solid pumpkin to the background piece. You will want to get as close to the bottom as you can.

3. Then glue the outline pumpkin on top of the solid pumpkin.

4. Next, arrange the lettering and glue that onto the background piece over the pumpkin.

5. Finally, arrange the leaves around the background and glue them into place.

6. Glue twine on the back of the sign for hanging in either of the styles shown in the example. Hot glue works quickest, but tacky glue also works!
