

Summer Paint Kit - Flip Flops

1. Paint all pieces and allow them to dry. Thin coats of paint will dry quickly & multiple thin coats will help avoid streaks.

2. Glue largest wave piece to base at bottom. Try to make it as flush to the edge as possible.

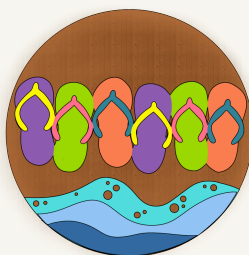

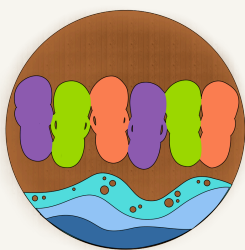

3. Glue smaller wave pieces on top of the largest wave piece. Again trying to stay as flush as possible with the edge.

4. Next, glue the flip flops above the wave and try to ensure it's centered.

5. Then glue the flip flops straps onto the flip flops. Take care to line them up with the curves on the sides.

6. Glue "hello" just above the flip flops

7. Finally, glue the individual letters for the word summer to each flip flops

8. Glue twine on the back of the sign for hanging in either of the styles shown in the example. Hot glue works quickest, but tacky glue also works!
